DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 13-18, drawn to a method of constructing a population of altered heavy chain region encoding nucleic acids, classified in class 435, subclass 69.1.
 - II. Claims 7-12, 19-24, drawn to a method of constructing a population of altered light chain encoding nucleic acids, classified in class 435, subclass 69.1.
2. The inventions are distinct, each from the other because of the following reasons:

The methods of Inventions I and II differ in the method objectives, method steps and parameters and reagents used. Invention I recites a method of constructing a population of altered heavy chain region encoding nucleic acids and Invention II recites a method of constructing a population of altered light chain encoding nucleic acids. The Groups are distinct because Group I encodes a heavy chain and Group II encodes a light chain. Each method is distinct because each method requires a distinct population of oligos for synthesis and the oligos for the light chain would not be used for the oligos for the heavy chain. The examination of all groups would require different searches in the scientific literature and would require the consideration of different patentability issues. Thus Inventions I and II are separate and distinct in having different method

objectives, method steps and parameters and reagents used and are patentably distinct.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).
